| <b>A climate law like the Zero Carbon Act is important because...</b> | I want my future kids to grow up with better air quality. I cycle to work and have to inhale copious amounts of carbon monoxide every day just to get to work and make a living. I am not sure if people understand how bad the air quality can be around public spaces, schools etc that aren't even that densely populated. There are alternatives to such a high amount of automobile use but there needs to be support from government to aid the transition. |
| <b>Long-term target</b>   | I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.                      |
| <b>Climate Commission</b>   | I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.   |
| <b>Adaptation</b>   | I support a plan for adaptation being included in the Zero Carbon Act.  |
| <b>Climate justice</b>  | A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.  |
