**I totally agree with the Green Partys bill on the The 2050 target. I have my second baby on the way and I need to know that the green party's efforts will bring a better future for my kids.**

- The Government should set a 2050 target of net zero emissions in legislation now.
- Net zero emissions goal should be across all greenhouse gases (including CO2 and methane).
- I'm not a great fan of beef, I eat it but would love to see New Zealand full of lambs again. Bring back the lambs!  
Lower the river wast and swim in the rivers.
