Dear Minister, I just wanted to personally say that climate change is a huge problem as I am sure you are aware and if we don't do something about it now, there will be no future. All the things that you and I enjoy about New Zealand and this world will be gone for the next generation and generations after if we don't take a stand now and start doing something. This will change New Zealand for the better and if we start then just think of all the other countries who will follow because someone has made the path. Yours sincerely, Charis Allison
