A climate law like the Zero Carbon Act is important because...	<p>Planet earth is the only one we have, protecting it is our shared duty. Let's not wait until it is too late.</p> <p>New Zealand is blessed for amazing landscape, breath taking mountains, fascinating wildlife and flora. It is cruel to damaged all those by being lazy taking actions today.</p> <p>Micro plastic from single use plastic can be found into the air we breathe, in the trees we grow. Hormones and harmful chemicals proven to be endocrine disruptor from daily products we use can be found in our lakes, river and tap water.</p> <p>Today we do not know how to face those 21st century issues. However, there is one simple thing that every country can do, and it is to aim to be 100% renewable energy based. We have the technology, and we have the ambition.</p>
Long-term target	<p>I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.</p>
Climate Commission	<p>I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.</p>
Adaptation	<p>I support a plan for adaptation being included in the Zero Carbon Act.</p>
Climate justice	<p>A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.</p>
