Dear Ministry for the Environment,

I believe in a net-zero carbon future for New Zealand. We need to make dramatic reductions in our emissions to keep climate change limited to 1.5 degrees and ensure our precious native plants and animals are protected. Nature is our taonga and we cannot exist without it. We must act together.

The key things I support in a Zero Carbon Act are:

- target for net-zero carbon emissions by 2040 should be in the Act.
- The emissions from transport, industrial activity, agriculture, and all other sources should be included in the target. Even 'short-lived' gasses can have a huge effect on our climate and need to be reduced.
- Emissions budgets should be at least as important as fiscal budgets, and the Government should set plans to achieve them.
- An independent Climate Change Commission of experts should monitor emissions and give advice to keep New Zealand on-track for its emissions reduction goals.

I support the effort to aim for net zero by 2040. As most large schemes end up running behind the intended finish date, by pulling it forward it decreases the chance of achieving this goal too late. Id love to see some onus placed upon councils to mirror the government scheme locally. I recently submitted to the PNCC because on paper they are right behind the scheme, but they won't undertake an investigation to ascertain what we need to do to reach the goal. Thanks
