**Reference no:** 8332

**Submitter Type:** Individual

**Clause**

1. What process should the Government use to set a new emissions reduction target in legislation?

**Position**

The Government sets a 2050 target in legislation now

**Notes**

**Clause**

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

**Position**

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

**Notes**

We should be more ambitious. Why are we not even consulting on net negative emissions? NZ is a developed nation and should be doing more than just aiming for no more harm.

**Clause**

3. How should New Zealand meet its targets?

**Position**

Domestic emissions reductions only (including from new forest planting)

**Notes**

Again, more ambition is needed. Can we get to a point where we are selling rather than buying international carbon units.

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

**Position**

No
