

# Your submission to Zero Carbon Bill

Anthony Armstrong

## Reference no: 8364

### Submitter Type:

#### Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

#### Notes

A strategy that understandings the earth is moving into a cooling period and thus reducing CO2 that grows our food is fool hardy. This Zero emission strategy clearly demonstrated we will find ample " food supply " be put at risk.

#### Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

#### Notes

None of the above. Fortunately climate change legislation will fail

#### Clause

3. How should New Zealand meet its targets?

#### Position

Domestic emissions reductions only (including from new forest planting)

#### Notes

#### Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

#### Position

Yes

#### Notes

As the implementation of another compliance tax is placed on the farming sector we will find the farming sector will find farming unaffordable with obvious outcomes and consequences.

#### Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

#### Position

No

#### Notes

#### Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

#### Position

Yes - each incoming Government should have the option to review the third budget in the sequence

#### Notes

#### Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

#### Position

Yes

#### Notes

#### Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

#### Position

No

#### Notes

**Clause**

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

**Position**

No

**Notes****Clause**

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

**Position**

No

**Notes****Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

**Position**

Advising the Government on policy settings in the NZ ETS

**Notes****Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

**Position**

No

**Notes****Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

**Position**

No

**Notes****Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

**Position**

No

**Notes****Clause**

Do you have any other comments you'd like to make?

**Notes**

Follow the tax and understand the overarching strategy. "A globalist aspiration to reduce global population." This strategy will achieve its goal and those who implement and support this venture through the tax will unfortunately be the first to realise their mistake.
