**A climate law like the Zero Carbon Act is important because...**
I want NZ to have the best environment experience so whether it’s me or a tourist I people to be able to walk / bike around without breathing in petrol and diesel fumes from vehicles.

**Long-term target**
I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.

**Climate Commission**
I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.

**Adaptation**
I support a plan for adaptation being included in the Zero Carbon Act.

**Climate justice**
A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.

**Further comments**
We need to publish more widely the air quality results collected by Auckland Councils Watercare to show how Auckland’s air quality compares to other cities- it’s not good and shows we have much to do to admit to ourselves we to take drastic action to improve our environment for us and our future.
