

Your submission to Zero Carbon Bill

Samantha Hoskins

Reference no: 9478

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Position

The Government sets a 2050 target in legislation now

Notes

Dependent on the support required to pass the legislation - however I believe it is the governments responsibility to act now and believe there is enough information to hand for the government to make the decision

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Position

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

Notes

Clause

3. How should New Zealand meet its targets?

Position

Domestic emissions reductions only (including from new forest planting)

Notes

The report highlights the scale of innovation and change required, but also the opportunity this offers New Zealand to create new industries and jobs. We should seize this opportunity with both hands, rather than shipping some of our responsibility off shore. International collaborations should focus on sharing innovative approaches and technology, not reinforcing inevitable power imbalances between countries.

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Position

No

Notes

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

Yes

Notes

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Position

Yes - each incoming Government should have the option to review the third budget in the sequence

Notes

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Position

No

Notes

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Position

Yes

Notes

I would like to see an inclusion of cultural impacts and a focus on environmental circumstances and adaptations.

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

Yes

Notes

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

The role of civil society will be vital in ensuring ground swell support behind the budgets. This will drive private sector engagement, but also help the general public to support changes required to meet budget. The agriculture sector is vital. Understanding how innovation can be used to provide opportunity, so budgets can offset change with opportunity. Budgets must be bold and brave and ensure equity across all sectors. Finally, a there must be a focus on inequality and how the budget will mitigate the inevitable imbalance across society.

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

Yes

Notes

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Position

Makes decisions itself in respect of the number of units available in the NZ ETS

Notes

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

Yes

Notes

I would suggest moving 'innovation' from desirable to essential.

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

Yes

Notes

Clause

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

Yes

Notes

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

No

Notes**Clause**

Do you have any other comments you'd like to make?

Notes

It is time to be brave and put in place policy and structure that leads the world, seizing the opportunity this point in time provides us to change our course.
