Submissions form

We seek your feedback on the specific proposals in the Zero Carbon Bill.

Either email this submission to ZCB.Submissions@mfe.govt.nz (Microsoft Word document (2003 or later) or PDF) or post to Ministry for the Environment, PO Box 10362, Wellington, 6143.

Publishing and releasing submissions

All or part of any written submission (including names of submitters) may be published on the Ministry for the Environment’s website, www.mfe.govt.nz. Unless you clearly specify otherwise in your submission, the Ministry will consider that you have consented to website posting of both your submission and your name.

Contents of submissions may be released to the public under the Official Information Act 1982 following requests to the Ministry for the Environment (including via email). Please advise if you have any objection to the release of any information contained in a submission, including commercially sensitive information, and in particular which part(s) you consider should be withheld, together with the reason(s) for withholding the information. We will take into account all such objections when responding to requests for copies of, and information on, submissions to this document under the Official Information Act.

The Privacy Act 1993 applies certain principles about the collection, use and disclosure of information about individuals by various agencies, including the Ministry for the Environment. It governs access by individuals to information about themselves held by agencies. Any personal information you supply to the Ministry in the course of making a submission will be used by the Ministry only in relation to the matters covered by this document. Please clearly indicate in your submission if you do not wish your name to be included in any summary of submissions that the Ministry may publish.

Our Climate Your Say: Submissions Form 1
Submitter type, pick one:

- Individual
- NGO
- Business / Industry
- Local Government
- Central Government
- Iwi / Māori
- University
- Research Institute
- School
- Community Group
- Unspecified / Other

2050 target

1. What process should the Government use to set a new emissions reduction target in legislation?
   Pick one:
   - the Government sets a 2050 target in legislation now
   - the Government sets a goal to reach net zero emissions by the second half of the century, and the Climate Change Commission advises on the specific target for the Government to set later.

   Optional comment  The Government should abandon all emission reduction targets.

2. If the Government sets a 2050 target now, which is the best target for New Zealand?
   Pick one:
   - net zero carbon dioxide: Reducing net carbon dioxide emissions to zero by 2050
   - net zero long-lived gases and stabilised short-lived gases: Long-lived gases to net zero by 2050, while also stabilising short-lived gases
   - net zero emissions: Net zero emissions across all greenhouse gases by 2050.

   Optional comment  None of the above.
3. How should New Zealand meet its targets?

Pick one:

- ☐ domestic emissions reductions only (including from new forest planting)
- ☐ domestic emissions reductions (including from new forest planting) and using some emissions reductions from overseas (international carbon units) that have strong environmental safeguards.

Optional comment: It should not meet any targets.

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Pick one:

- ☐ yes
- ☑ no.

Optional comment: The targets cannot change global greenhouse gas emissions by more than 0.0017% using the MF1 figures, i.e. 0.17% of all greenhouse gases.

Emissions budgets

5. The Government proposes that three emissions budgets of five years each (ie, covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Pick one:

- ☐ yes
- ☑ no.

Optional comment: The economy would have to cease, and tyrannical laws would be needed to approach the 0.0017% saving. The danger is not clear enough to warrant budgets.

6. Should the Government be able to alter the last emissions budget (ie, furthest into the future)?

Pick one:

- ☐ yes, each incoming Government should have the option to review the third budget in the sequence
- ☐ yes, the third emissions budget should be able to be changed, but only when the subsequent budget is set
8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets?
Pick one:
☐ yes
☒ no.

Optional comment: The innovations required are, either not in place, or not yet invented. The business opportunities are, likewise, not operating or have never operated.

Government response

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?
Pick one:
☐ yes
☒ no.
10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Comment: Achievement of a carbon target cannot be clearly shown to anyone. A computer estimate of progress towards a computer estimated problem is too fragile to use.

Climate Change Commission

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand’s progress towards its goals. Do you agree with these functions?

Pick one:
☐ yes
☒ no.

Optional comment: The CC Commission cannot be independent because its job is to implement an unproven theory, not to investigate it, or even question it.

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Pick one:
☐ advising the Government on policy settings in the NZ ETS
☐ makes decisions itself, in respect of the number of units available in the NZ ETS.

Optional comment: The CC Commission has no helpful role to play.

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise?

Pick one:
☐ yes
Adapting to the impacts of climate change

14. Do you think the Zero Carbon Bill should cover adapting to climate change?
Pick one:
☐ yes
☒ no

Optional comment  The CC Commission is unnecessary. By its nature it can only produce propaganda for human induced climate change theories.

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions?
Pick one:
☐ yes
☒ no.

Optional comment  Sufficient Government agencies already exist to account for climate change adaptation. Councils do it every day.

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?
Pick one:
☐ yes
☒ no.

Optional comment  The relatively slow progress of climate change does not require superfluous over reporting.

Thank you for the opportunity to present my views.
