A climate law like the Zero Carbon Act is important because... It's will make a difference to the future state of the planet. The current way that humans treat and use earth is killing it and making it impossible for future generation to live in a health environment. by making a Zero Carbon act this is a step in the right direction of looking after the planet.

Long-term target I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.

Climate Commission I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.

Adaptation I support a plan for adaptation being included in the Zero Carbon Act.

Climate justice A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
