The Government sets a 2050 target in legislation now

We have delayed too long already - we are a developed nation and should be leading not trailing

### Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

### Notes

We need to take this problem seriously and get on with it

### Position

Domestic emissions reductions only (including from new forest planting)

### Notes

Dont offload our responsibility on dodgy schemes as the previous government did

### Position

No

### Notes

Certainly not for GDP figures

### Position

No - emissions budgets should not be able to be changed

### Notes

Not unless there is a sound scientific reason for doing so
