

Your submission to Zero Carbon Bill

Blayne Newton

Reference no: 11528

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

There should be no emission target.

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

No target

Clause

3. How should New Zealand meet its targets?

Notes

There is no target to meet

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Notes

The zero carbon bill should not be enacted

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

No

Notes

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Notes

No emissions target need to be set

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Notes

No emissions target need to be set

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Position

No

Notes

There should be no consideration necessary as there is no budget

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

No

Notes

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

No issues to consider as the Bill should not be enacted

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

No

Notes

NO, another commission sucking money from the taxpayer.

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Notes

No role at all

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

No

Notes

No, more money wasted

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes

No, humanity, for millions of years, have adapted to changing climates with out governments.

Clause

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

No

Notes

NO

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Notes

Another useless body sucking money from the taxpayer

Clause

Do you have any other comments you'd like to make?

Notes

The climate has been changing since the beginning of time. Carbon is needed for vegetation to grow. ONE coal mine in Australia puts out as much carbon as NZ does in a year. Our carbon emissions are a fraction of 1 percent of the world total. If this goes ahead, the virtue signalling will send the country broke. Virtue signalling is effectively all this is doing
