

Your submission to Zero Carbon Bill

Rabbidge (Stephen)

Reference no: 11572

Submitter Type:

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

No reduction targets necessary. Start reading the science that confirms that Man does not have any affect on "Climate Change"

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

NONE ...Targets completely unnecessary

Clause

3. How should New Zealand meet its targets?

Notes

As above ...No targets required .Climate change is the biggest hoax in the history of mankind.

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Position

Yes

Notes

If any targets are introduced they will have to be revised when the countries economy collapses because of this stupidity.

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Notes

More ideological nonsense

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Notes

As above

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Position

No

Notes

Climate Change Commission should be disbanded and declared irrelevant.

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

No

Notes

The Zero Carbon bill will confirm to the rest of the world how ridiculous it is to attempt to change the weather...unbelievable stupidity.

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

Realists who recognise a scam when they see it.

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Notes

NONE !! Both the Commission and an ETS have been devised to deal with an issue that does not exist.

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Notes

It is essential and desirable that they all find other jobs that will contribute to our future ...not destroy it.

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

No

Notes**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Notes

More beaurocratic rubbish .

Clause

Do you have any other comments you'd like to make?

Notes

I only hope that politicians and Climate Change theorists realise that the notion of climate being affected by man is an absolute con before it is too late. History will show that supporters of such a proposal will be the laughing stock of future generations.
