

Your submission to Zero Carbon Bill

James Fraser (James)

Reference no: 11580

Submitter Type: Individual

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Position

Net Zero Long-Lived Gases and Stabilised Short-Lived Gases - Long-lived gases to net zero by 2050 while also stabilising short-lived gases

Notes

Clause

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Notes

Clause

Do you have any other comments you'd like to make?

Notes

Who exactly is going to pay for this within the agricultural sector? A standard levy on all stock killed is unfair. Budgets need to be met on an individual basis. Those who are carbon positive will not subsidise the polluters.
