

# Your submission to Zero Carbon Bill

Nicholas Butcher, **Nicholas David Butcher**

## Reference no: 11636

**Submitter Type:** Individual

### Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

### Position

The Government sets a 2050 target in legislation now

### Notes

### Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

### Position

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

### Notes

### Clause

3. How should New Zealand meet its targets?

### Position

Domestic emissions reductions (including from new forest planting) and using some emissions reductions from overseas (international carbon units) that have strong environmental safeguards

### Notes

### Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

### Position

No

### Notes

Minor changes wouldn't be sufficient to warrant changing the target. Major changes in circumstances are sufficiently unlikely that, if they occur, new legislation can be drafted to affect the necessary change.

### Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

### Position

Yes

### Notes

### Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

### Position

Yes - each incoming Government should have the option to review the third budget in the sequence

### Notes

### Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

### Position

Yes

### Notes

### Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

### Position

Yes

**Notes**

**Clause**

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

**Position**

Advising the Government on policy settings in the NZ ETS

**Notes**

**Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

**Position**

No

**Notes**

Doing so would mean the scope becomes too broad. There will probably be cases where we're better investing to adapt than investing to reduce, but I'd like to see a large focus on reduction for now, with adaptations implemented as needed.

**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

**Position**

Yes

**Notes**
