### Notes

No emission targets should be set. The whole carbon issue is a proven lie.

**Notes**

Irrefutable proof that Carbon is a cause of Climate change does not exist. All the models to date have been shown to be faulty while the climate keeps changing as it has done for billions of years. Some people are getting very rich off the back of the Climate/carbon rort and it is past time for our politicians to spend our tax money in New Zealand rather than gift it to unaccountable recipients overseas.
