**A climate law like the Zero Carbon Act is important because...**

Climate change disproportionately and advisedly effects People with Disability in Aotearoa and abroad. People with Disability's must be woven in to all current and future bills, treaties and mechanisms that address Climate change and sustainability as key stakeholders.

Climate Change is inherently a Disabilities issue and we are being left out of the conversation, this is in direct violation of the UNCRPD and the UNFCCC Paris agreement. Nothing about us without out us.

**Long-term target**

I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.

**Climate Commission**

I support the establishment of an independent Climate Commission that is made up of experts and provides advice, and people with relevant lived experience (PWD and Maori and gender diversity) but does not make final decisions.

**Adaptation**

I support a plan for adaptation being included in the Zero Carbon Act.

**Climate justice**

A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.

Climate change disproportionately and advisedly effects People with Disability in Aotearoa and abroad. People with Disability's must be woven in to all current and future bills, treaties and mechanisms that address Climate change and sustainability as key stakeholders.
