

# Your submission to Zero Carbon Bill

## Reference no: 12625

**Submitter Type:** Individual

**Clause**

1. What process should the Government use to set a new emissions reduction target in legislation?

**Position**

The Government sets a 2050 target in legislation now

**Notes**

**Clause**

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

**Position**

Net Zero Emissions - Net zero emissions across all greenhouse gases by 2050

**Notes**

It is essential to differentiate long-lived and short-lived gases (a two basket approach) in developing policies and strategies for implementation. In addition, distinguish between fossil methane and biological methane in policies.

**Clause**

3. How should New Zealand meet its targets?

**Position**

Domestic emissions reductions only (including from new forest planting)

**Notes**

**Clause**

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

**Position**

No

**Notes**

Emissions targets could be brought forward if there is new scientific evidence of what is required for a safe climate.

**Clause**

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

**Position**

Yes

**Notes**

**Clause**

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

**Position**

Yes - the third emissions budget should be able to be changed but only when the subsequent budget is set

**Notes**

**Clause**

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

**Position**

Yes

**Notes**

but only to increase the speed of emissions reductions.

**Clause**

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account

when advising on and setting budgets? See p44 Our Climate Your Say

**Position**

Yes

**Notes**

together with the following: to reduce cumulative emissions sufficiently to avoid dangerous climate change, the steepest emissions cuts to carbon dioxide must occur in the first 10 years, with possibly less steep cuts thereafter.

**Clause**

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

**Position**

Yes

**Notes**

**Clause**

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

**Notes**

Climate change is a global issue and at all stages NZ needs to be cognisant of opportunities provided by working with other jurisdictions to have a collective impact. This in no way means reducing our ambition in terms of reducing domestic emissions. Also, the fossil fuel industry itself is an obstacle to transition as their business strategies reflect a sense of denial of the problem and a need to adjust. There is no need to recompense representatives of these industries as they have garnered massive profits over the years. There is an obligation to assist existing staff to transition out of these industries where possible and to assist those people who will be most affected by climate change.

**Clause**

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

**Position**

Advising the Government on policy settings in the NZ ETS

**Notes**

**Clause**

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

**Position**

Yes

**Notes**

**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

**Position**

Yes

**Notes**

**Clause**

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

**Position**

Yes
