### A climate law like the Zero Carbon Act is important because...

We have to keep it green! We only get one world - already so much irreversible damage had been made we have to stop and change the way we live and try to repair some of things we can still fix.

### Long-term target

I support the most ambitious target of reducing total greenhouse gases to net zero by 2050. I also support taking a science-based approach to ensure our efforts to reduce emissions are as impactful as possible: we should aim for negative levels of long-lived gases, while reducing short-lived gases to sustainable levels. This target should be reached by reducing our own emissions and not by using international carbon credits.

### Climate Commission

I support the establishment of an independent Climate Commission that is made up of experts and provides advice, but does not make final decisions.

### Adaptation

I support a plan for adaptation being included in the Zero Carbon Act.

### Climate justice

A Zero Carbon Act must be just and fair in that it honours Te Tiriti o Waitangi; ensures a just transition for workers and communities; and avoids passing on the costs to future generations.
