

Your submission to Zero Carbon Bill

owen christie

Reference no: 12998

Submitter Type: Individual

Clause

1. What process should the Government use to set a new emissions reduction target in legislation?

Notes

Don't set targets for something which is not a problem. Stop wasting time and money.

Clause

2. If the Government sets a 2050 target now, which is the best target for New Zealand?

Notes

Any target will result in the death of living organisms. We know this is the United nations agenda 2030. Stop proposing solutions that end in death. This is a deluded policy if it thinks it will be good for any people.

Clause

3. How should New Zealand meet its targets?

Notes

Pull out from the climate change treaty

Clause

4. Should the Zero Carbon Bill allow the 2050 target to be revised if circumstances change?

Notes

Don't even pass the bill. Get rid of the ministry and save tax payer dollars to pay for more useful things like more nurses.

Clause

5. The Government proposes that three emissions budgets of five years each (i.e. covering the next 15 years) be in place at any given time. Do you agree with this proposal?

Position

No

Notes

Clause

6. Should the Government be able to alter the last emissions budget (i.e. furthest into the future)?

Notes

No money should be available for climate change. End of story.

Clause

7. Should the Government have the ability to review and adjust the second emissions budget within a specific range under exceptional circumstances? See p36 Our Climate Your Say

Notes

No emissions budgets should be created.

Clause

8. Do you agree with the considerations we propose that the Government and the Climate Change Commission take into account when advising on and setting budgets? See p44 Our Climate Your Say

Notes

As above

Clause

9. Should the Zero Carbon Bill require Governments to set out plans within a certain timeframe to achieve the emissions budgets?

Position

No

Notes

Zero carbon is a dangerous and deathly proposition

Clause

10. What are the most important issues for the Government to consider in setting plans to meet budgets? For example, who do we need to work with, what else needs to be considered?

Notes

Self sufficiency in nz. Stop reliance on foreign capital. Break any international treaties constraining us.

Clause

11. The Government has proposed that the Climate Change Commission advises on and monitors New Zealand's progress towards its goals. Do you agree with these functions? See p42 Our Climate Your Say

Position

No

Notes**Clause**

12. What role do you think the Climate Change Commission should have in relation to the New Zealand Emissions Trading Scheme (NZ ETS)?

Notes

None other than terminating any foreign commitments.

Clause

13. The Government has proposed that Climate Change Commissioners need to have a range of essential and desirable expertise. Do you agree with the proposed expertise? See p45 Our Climate Your Say

Position

No

Notes

No. climate change is well proven to be unfounded scientifically. Stop wasting any more money and effort. Instead focus on how to make nz more productive and self sufficient.

Clause

14. Do you think the Zero Carbon Bill should cover adapting to climate change?

Position

No

Notes**Clause**

15. The Government has proposed a number of new functions to help us adapt to climate change. Do you agree with the proposed functions? See p47 Our Climate Your Say

Position

No

Notes

No new functions needed

Clause

16. Should we explore setting up a targeted adaptation reporting power that could see some organisations share information on their exposure to climate change risks?

Position

No

Notes

Even more costs, with no benefit.

Clause

Do you have any other comments you'd like to make?

Notes

Climate change is a religious belief. This world is passing away fast. Focus your efforts on issues of lasting eternal significance where Jesus is your only hope. . .
