Subject: Zero Carbon Bill

To Whom it may Concern,

I am strongly opposed to the Labour and Greens Zero Carbon Bill in all forms. I am not prepared to accept the drastic economic consequences of their Zero Carbon Bill which Climate Change Minister James Shaw is dishonestly down-playing the costs and claiming benefits when there are none. The burden will fall disproportionately on the poor, lower income households and farming intensive industries which are the backbone of our economy.

It is an unproven theory with no real-life evidence that dangerous man-made global warming exists. To attack Carbon Dioxide is untenable as it remains essential for life on earth. Carbon Dioxide causes Global Warming like Wet Roads cause Rain. The Zero Carbon Bill should be rejected in the strongest possible way and withdrawn.
