### Position

Yes

**Notes**

**Clause**

9. Do you think that reasonably practicable alternatives to single-use plastic shopping bags exist in New Zealand? Why / why not?

**Position**

Yes

**Notes**

There are many other alternative ways of transporting and packaging goods. These need to be fully explored. In many cases, there is no need for a bag/packaging at all. This requires a significant mind-shift for the public and retailers alike, but it's very much possible.

**Clause**

10. How can people be encouraged to reuse multiple-use shopping bags enough times to offset the environmental impacts of producing them? (select one or more)

**Position**

national information campaign and mobile phone app for shoppers

**Notes**

Incentive schemes would be great as well.

**Clause**

11. What would help you and your family adjust to life without single-use plastic shopping bags?

**Notes**

We already use as few as possible and are trying to reduce plastic use and buy products with minimal packaging.

**Clause**

12. How can data on single-use plastic shopping bags and other single-use plastics entering the market and monitoring of reductions be improved?

**Notes**

I think that this is especially important with items coming in from overseas. There are a lot of cheap and nasty plastic products, as well as packaging, being brought in by importers. I don't know how we can more effectively monitor this though.

**Clause**

13. Please provide any additional comments or suggestions about the proposed mandatory phase out of single-use plastic shopping bags.

**Notes**

Please please implement this! It is a major first step in the fight to preserve our planet.
