12. How can data on single-use plastic shopping bags and other single-use plastics entering the market and monitoring of reductions be improved?

13. Please provide any additional comments or suggestions about the proposed mandatory phase out of single-use plastic shopping bags.

**Notes**

I encourage it and support it. You need to get some professional help writing these survey questions - or at least pilot the survey before publication. Too many assume a level of knowledge that is not wide-spread in the community. You won't get reliable data from the responses because people will be making things up.
