1. Do you agree with the proposed mandatory phase out of the sale or distribution of single-use plastic shopping bags in New Zealand, including those made of degradable (eg, oxo-degradable, biodegradable and compostable) plastic? Why / why not?

Position

Yes

Notes

I no longer accept single use plastic bags or straws from shops. It's actually very easy so single use plastic bags are completely unnecessary

as above

8. Do you agree that the benefits expected from implementing a mandatory phase out of single-use plastic shopping bags exceed the costs expected from implementing the phase out? Why / why not? Information on the types of reusable bag is important. Plastic types could cause as many problems as they solve - I believe biodegradable reusable bags are important, ideally made from waste (offcut) material.

We have adjusted already
