We already have

**Clause**

12. How can data on single-use plastic shopping bags and other single-use plastics entering the market and monitoring of reductions be improved?

Find out how much plastic is being used to wrap goods in manufacturing

**Clause**

13. Please provide any additional comments or suggestions about the proposed mandatory phase out of single-use plastic shopping bags.

**Notes**

I hope it is the first step and manufacturing will be next. Straws, milk bottles, coffee lids, and other common plastics are already voluntarily being phased out. I want to see manufacturing plastic, both that used to wrap toilet rolls etc, but also that used to wrap whole pallets of products replaced by compostable bioplastic.
