Publishing and releasing submissions

All or part of any written submission (including names of submitters) may be published on the Ministry for the Environment's website www.mfe.govt.nz. Unless you clearly specify otherwise in your submission, we will consider that you have consented to website posting of both your submission and your name.

Contents of submissions may be released to the public under the Official Information Act 1982 following requests to the Ministry for the Environment (including via email). Please advise if you have any objection to the release of any information contained in a submission and, in particular, which part(s) you consider should be withheld, together with the reason(s) for withholding the information. We will take into account all such objections when responding to requests for copies of, and information on, submissions to this consultation under the Official Information Act.

The Privacy Act 1993 applies certain principles about the collection, use and disclosure of information about individuals by various agencies, including the Ministry for the Environment. It governs access by individuals to information about themselves held by agencies. Any personal information you supply to the Ministry in the course of making a submission will be used by the Ministry only in relation to the matters covered by this consultation. Please clearly indicate in your submission if you do not wish your name to be included in any summary of submissions that the Ministry may publish.

Questions

1. Do you agree with the proposed mandatory phase out of the sale or distribution of single-use plastic shopping bags in New Zealand, including those made of degradable (eg, oxo-degradable, biodegradable and compostable) plastic?

- Yes
- No
- Not sure

Why / Why not?

It is a necessary step towards getting New Zealanders to question their attitudes around single-use items. The lack of access to processing/recycling facilities for oxo-degradable, biodegradable and compostable means that these should also be included in the phase out.

2. We have proposed a mandatory phase out of single-use plastic shopping bags. This could include under 50 microns or under 70 microns in thickness.

If you agree with a mandatory phase out, which option do you prefer, and why?

- less than 50 microns in thickness
- less than 70 microns in thickness
- Other (please specify)

To encourage bags that are more durable and genuinely reusable.

3. Are you aware of types of single-use plastic shopping bags that should be exempt from a mandatory phase out?

- Yes
- No
- Not sure

If yes, what are they and why should they be exempt?

4. Do you currently manufacture, sell, provide or import for sale or personal use these types of single-use plastic shopping bags:

- a. 50 microns or less in thickness
- b. more than 50 microns and less than 70 microns in thickness?

- Yes
- No
- Not sure

If yes, please specify which bags and explain how a phase out would be likely to impact on you.

5. Should smaller retailers be exempted from a mandatory phase out of single-use plastic shopping bags?

- Yes
- No
- Not sure

Why / Why not?

6. If smaller retailers are exempted from a mandatory phase out of single-use plastic shopping bags and they are defined by their number of full-time equivalent employees, what should that number be?

N/A

7. The proposed mandatory phase-out period for single-use plastic shopping bags is at least six months from when regulations are Gazetted, subject to consultation. Do you agree with this timing?

- Yes
 No
 Not sure

Why / Why not?

[Click here to enter text.](#)

If no, what do you think would be a more appropriate phase-out period?

- two months
 nine months
 one year
 other (please specify)

[Click here to enter text.](#)

8. Do you agree that the benefits expected from implementing a mandatory phase out of single-use plastic shopping bags exceed the costs expected from implementing the phase out?

- Yes
 No
 Not sure

Why / Why not?

Please consider both monetary and non-monetary costs and benefits (those that can be measured by money as well as those that can't).

9. Do you think that reasonably practicable alternatives to single-use plastic shopping bags exist in New Zealand?

- Yes
 No
 Not sure

If no, what do you think is missing currently that would need to be available?

I think there are reasonably practicable alternatives however the majority of alternatives being offered up by the big retailers are not ideal in that they aren't as durable as they need to be to be reused enough to have a positive environmental impact.

10. How can people be encouraged to reuse multiple-use shopping bags enough times to offset the environmental impacts of producing them? (select one or more)

- voluntary incentive schemes by individual retailers
- national information campaign and mobile phone app for shoppers
- other (please specify)

11. What would help you and your family adjust to life without single-use plastic shopping bags?

N/A - I already do this. However, there should be more simple, positive awareness campaigns from the government to support behavioural change. Also, facilitation of home composting collections which will also enable people to stop using plastic bags to line bins.

12. How can data on single-use plastic shopping bags and other single-use plastics entering the market and monitoring of reductions be improved?

Retailers should be required to provide collated data on single use plastics as part of a mandatory product stewardship scheme for single use plastics and packaging. Targets for reductions over time should be set and tracked.

13. Please provide any additional comments or suggestions about the proposed mandatory phase out of single-use plastic shopping bags.

Retailers should be provided information on:

- The most environmentally friendly alternatives to single use plastic bags.
- The need to avoid bags made from composite materials e.g. jute bags lined with plastic; paper bags with rope handles.
- The need to have certification for any reusable compostable bags
- The importance of providing disposal information (e.g. recycling, composting, landfill) on the bag for end-of-use.
