

# Your submission to Clean Water

**Madeline Anne Hinehauone Cook**

**Clause**

What are your thoughts on the proposed swimming targets, for example, on the timeframes and categories?

**Notes**

These targets are not good enough. The fact that we allow farming run off into waterways is ludicrous. Not only is it terrible for the environment, but it is also going to ruin our economy. Having water that can be swum in safely, 20/20 times, is so vital to our tourism industry. Land can be diversified. There are other ways to profit from it. So do what the people want, clean up the rivers and slash the number of dairy cows contributing to run off.

**Clause**

What do you think about the proposed amendments to the Freshwater NPS?

**Notes**

Once again a mad idea. Funnelling finite resources off shore to make some profit is short term thinking that just causes more problems in the long run. As a member of the public, I want to know that our natural resources are being protected and managed with the attitude of caution, no one of gold rush fever.

**Clause**

What are your thoughts on the proposed stock exclusion regulation, for example, the timeframes and stock types to be excluded?

**Notes**

I don't know enough about the stock exclusion regulation to make any specific comments. But if it is in line with the other terrible regulation reforms, then I'm sure it's not a winner in the legislation game.
