To whom it may concern,

We need to consider the Enormous economic and environmental costs of doing nothing. The cost of reducing our emissions by 40% is not much more than reducing by 10% which might as well be nothing. We need to demonstrate that New Zealanders take climate change seriously. Without a real action plan to reduce climate pollution, the Government risks damaging our global reputation and wrecking our economy. But most importantly, they are denying New Zealanders the cleaner, smarter and safer future that we all deserve.

Sincerely,

Philippa Cresswell
