Objectives for the contribution

Do you agree with these objectives for our contribution? No

1b. What is most important to you?

Simply: you are not doing enough to look your children in the eyes without having an argument.

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set?

I have difficulties understanding this sentence, and so do many other people! Who wrote this stuff? The nature of the emissions...(?)

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?

Who created this form? When I click on the answer field the question disappears. Crap!

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand? Again!

Question is gone! Who made this website!

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

The uncertainties of technology and costs! Do you mean the cost of doing too little?

Other comments

6. Is there any further information you wish the Government to consider? Please explain.

I think this list of questions is badly formulated, or actually strongly biased. With a too short notice to reply (one whole week, wow, this must be important!). What do you think of this website? Are you proud of it?

Asking for personal detail on an unsecured (non HTTPS) website is less than amateur work.

PS: when I watch the video on youtube, the followup videos are all (ALL) climate sceptic videos. Do you think this

has an effect on the answers people will give?
Shame on you for allowing this...!
