Do I want to be able to swim in ALL our rivers? Yes. And so should my children and future generations.

We should be able to drink from, our rivers, this should be a given and it is unthinkable that we have polluted our own water to such a state. Of course it is our responsibility to clean them up and fast, not just sink into apathy and pretend that they are OK.

There are plenty of inspiring river clean up stories, from other parts of the world to help guide us.

NZ we should be leading the way in this, not just shrugging off responsibility.

Clean them up and keep them clean for swimming, for recreation, for drinking.....there should be no other option.

Yours sincerely

Jane Evans
