To whom it concerns,we love this beautiful country we call NZ and in the eyes of the world we are a Jewel to behold.The Clean and Green Image comes with the territory.Preserve what nature has bestowed on us and work Bloody hard on behalf of all New Zealanders to ensure it remains paradise.We used to swim in Rivers that are no more than a muddle today,drink running water from steams as we hiked along the valley floor,caught Fish that we felt were safe to Eat,now we have lost the freedom especially in the mid to lower river reaches. You have the responsibility to future generation to once again make a stand and provide a environment in which all Freshwater Fish can live a Healthily and purposeful life to the community as a whole.The National Frame work should include measurable parameters that directly relate to these values. The New Zealand Government and it workers will be held personally responsible by the not only fellow NZers but the Hugh influx of overseas visitors should the Rivers further decline to support Multi-National corporations.Look at history my friends and learn about the environmental destruction countries around the world have been exposed and exploited for the sake a a few Dollars from a Multi National. So take a hard long look at yourself and think where do I live and where will my children,live and their children. It ironic that In 1984 New Zealand's declares a nuclear-free zone,yet Thirty Years we are slowly destroying our own country.It not the "outsiders" we should be worried about it is the "insiders" our own countryman.We are prepared to support The Sea Sheppard yet, when it comes to our own counties environmental issues we but our heads in the dry and polluted rivers bed. It is with great Regret I should be sending this Submission as it is a very easy choice as to what should be done to preserve the True Nature of a Country like New Zealand.
