I am concerned about the quality of the water and the way it is tested.

I would like to see more stringent testing, best practise testing and a continuous flow of information to the public on the results for safety and consideration by the public and accountability for the waterways on our behalf by Govt.

I am advised the standards MFE are imposing are neither World best practise or an effective measure of water quality.

I expect that to occur for our safety in 100% of our waterways and for 100% pure NZ.

Thank you

Kath Lauderdale (Ms)
