

To whom it may concern,

I speak not only for myself but for all the up and coming New Zealander fresh water fisher persons who want all the New Zealand rivers, streams, and lakes kept in a pristine level of cleanliness as I have witnessed first hand here in Rotorua how lakes can deteriorate to a level where we cannot eat the Trout or even swim in the lakes we catch them from.

The government, local council and local Iwi's have all banded together to bring this mess to a halt and try to regain a better balance of water quality for now and the future generations of New Zealanders.

We New Zealanders all promote and pride ourselves on how "CLEAN AND GREEN" we are !!! Yet we currently are poisoning our waterways with phosphates, spraying, and the over kill of Dairy farm conversions plus the killing our wild life with 1080 Poison, Frogs, Fish, Kiwis, Kaka, Weka, Fantails and so on in the belief we are saving our forests.

I like most residents' of New Zealand voted a Government into power that would look after the welfare and the state of our beautiful country. Remember it is coming up to voting time soon.

GOD ONLY KNOWS WHEN WE WILL COME TO OUR SENSES BEFORE IT IS TO LATE.

Kind Regards,
