

To the Government members

It is with great sadness that I see that the government is planning to do a plan change so that our rivers can be polluted to the extent that we will no longer be able to swim in them. Is this for the sake of money/profit? It is unbelievable. What shame we bring on ourselves in the eyes of our children, grandchildren.

There are ways to have good farm management - not being too greedy - and still keep our rivers clean.

New Zealand will be a laughing stock in the eyes of the world! CLEAN GREEN! - don't think so- good-bye tourism!!!!

Please, you represent the country, and the majority do NOT want New Zealand waters ruined in this way, do not pass this bill.

Josephine Marsden
