Subject: RE: NZTA informal comments on the discussion document containing proposed amendments to the NPS Freshwater Management

Hi [withheld],

Apologies but one minor correction to NZTA's comment below are that any references in the NZTA's submission around applying Best practical option is to include it "**not to be applied as a condition of consent**". For example the responses to Q's 3, 17, 19 would have the following added (in red text):

- *"applying the best practical Option (BPO) approach in the absence of available data, **but not to be applied as a condition of consent**"*

Regards
