## **Kind Attention to the Ministry of the Environment,**

I'm a foreign Fly anglers and I visited several of your wonderful rivers and I would tell you that is my opinion that all New Zealand freshwaters should be swimmable, fishable and safe for food gathering and that the National Objectives Framework should include measurable parameters that directly relate to these values.

I would point out that the rivers and lakes where I hope to go soon again in my future will be again habitable to trout and salmon and safe for fishing to allow me and all the Kiwi' and all people from every where in the world to enjoy your paradise.

Best Regards

Alessandro Padovani
