Subject: keep our green clean
Date: Wednesday, 29 January 2014 9:13:56 p.m.

Living within [withheld] and still in suburbia with farming on the fringe of our valley it distresses me to witness cattle/stock polluting the water way within metres of residential housing. Just a basic fence of the stream would keep our water local fresh water stream clean but the owners don't because 'they don't have to'. What can you do to make sure such unnecessary pollution is avoidable?
