Date: Wednesday, 29 January 2014 2:29:29 p.m.

We consider the proposed amendments to the National Policy Statement for Freshwater Management 2011 (NPS-FM) to be inappropriate in their low standard of water quality and the length of time that polluters have to comply, during which damage to the waterways will occur. We need to raise water standards by imposing high fines to polluters, particularly by the massive dairy industry and dairy farmers.
