Please make sure our rivers & waterways are safe for swimming, by measuring the oxygen & nitrogen levels & the number & health of aquatic life.

I gather there are other checks for a clean & healthy river. Please check them all.

I do not want water, air or land pollution in NZ.

Keep/make us clean & 'green'.

The environment is precious. So is our lifestyle. Tourism also relies on the cleanliness & beauty of our landscape.

We need stringent rules (eg for dairy & industry) to keep it that way.

Thanks

Sue
