[withheld]

I fully support calls by the Green Party (and others) to strengthen the rules surrounding fresh water quality in rivers (and elsewhere). Rather than repeat their messages here, I will simply add my voice to theirs, and urge parliament to institute rules that state clearly what water quality standards New Zealanders can expect, and which put strict limits on the already unsustainable proliferation of intensive farming (dairy most obviously) in environments not naturally suited to such farms.

Regards,
Paul Qualtrough.

Paul Qualtrough
