

I am writing with regards to the proposed amendments to the NPS-FM 2011, specifically the national values and uses of fresh water. I want to make it absolutely clear that I want **Section 4.3 Compulsory Value to be set to a swimmable/safe immersion level**. I consider anything less than this to be a gross mistreatment of our waters and an unnecessary risk to the health and vitality not only of the biological beings whose lives are dependent on said waters but also to us, the human beings whom the government is meant to represent.

Thank you,

Erica Richards
