

i wish to submit that beautiful clean green New Zealand is becoming not just myth, but a sick joke. a sick joke on all of us. Even those making a profit from their thoughtless and selfish action. We all need the air we breath, the water we drink and the food we eat to be clean and good quality. let us temper the raw avarice and start acting responsibly;y. it is always easier to change that one thinks and the rewards of doing things in a considered fashion can be wonderful. I would like to refer you to the work of Graeme Sait, a Kiwi soil scientist. he has the answers for us and it doesn't cost any more and will end up costing less for our dear and valued dairy farmers.
