

To Whom it May Concern,

I implore the Ministry for the Environment to protect our rivers for future generations by maintaining the highest standards possible. It is vital that section 4.3 Compulsory Value be set at a swimmable and safe immersion level. It is sad we can no longer safely drink from our rivers and I hope one day we will be able to do so. Lets make this our aim rather than opening the door to further degradation by the diary farming industry etc.

We are the guardians of this land and we need to act in the interest of our children and grandchildren not be puppets of those out to make a dollar at the expense of our beautiful natural resources.

Kind Regards,

Miranda
