

QUESTIONS FOR SECTION 4.3: Compulsory values in the NPS-FM

25. Do you agree that ecosystem health should be a compulsory value?

Yes

26. Do you agree that human health for secondary contact recreation (such as boating and wading) should be a compulsory value?

I think that all freshwater (streams, rivers & lakes) in New Zealand should be free enough from the effects of pollution so that we are able to swim (or immerse) in it. Compulsory legislation should have the intention of returning New Zealand freshwater to that state.

regards,
Stephen Zanetti
