Subject: Submission 10983

Hello

Sorry, I am short of time for this submission.

But do want to say please set targets that we as a country can be proud of.

Include agriculture.

Acknowledge what we do do well.

And work on what we can improve.

We should be world leaders in alternative energy - we have a lot of it.

Support research and science that builds on this.

Create business opportunities rather than looking for the negative business consequences.

thanks

cheers

Cath Gilmour
