Name Jill Greathead

Organisation (if applicable)

Address [REDACTED]

Telephone [REDACTED]

Email [REDACTED]

## Objectives for the contribution

Do you agree with these objectives for our contribution? Yes

1b. What is most important to you?

it is seen as a fair and ambitious contribution – both by international and domestic audiences

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set? Be the leader for the rest of the world

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption? You will get lower consumption by encouraging and educating our people

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

Increasing forest sinks

Increasing usage of public transport and remote working

Offer subsidies on solar energy and battery options

## Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

The future is always uncertain but it will be very uncertain if we continue to ignore the issues of climate change so we have no option than to embrace a green economy with a low carbon future

## Other comments

6. Is there any further information you wish the Government to consider? Please explain.

The plant will survive - the human race may not if we continue to disrespect our plant. Take a look at these videos - they have some grave messages - <http://natureisspeaking.org/>
