Objectives for the contribution

Do you agree with these objectives for our contribution? No

1b. What is most important to you?
"Climate change is a hoax led by the United Nations so that it can end democracy and impose authoritarian rule" - Maurice Newman, Tony Abbott's chief business adviser.

The NZ government should ignore all this man made climate change nonsense. Compulsory reading for every parliamentarian should be “Air Con” and "Totalitaria" by Ian Wishart. Carbon dioxide is essential for life and is not a pollutant.

What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand’s emissions and economy means for the level of target that we set?
We do not need any targets. Ignore the spurious so called science by those who are making a lot of money out of this nonsense. The whole climate change nonsense is an economic rort.

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce it’s greenhouse gas emissions? For example, what would be a reasonable reduction in annual household consumption?
We have become a Godless society. If you acknowledged the creator God of the Bible then you would know that the planet is more than capable of dealing with livestock emissions. There should be no policies that will impact on our agriculture. We should not have to make any reductions at all.

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?
There should be absolutely no requirement whatsoever for NZ to reduce its emissions.

Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?
It should recognise that the so called science is flawed and refuse to be dominated by the UN's IPCC and the UN's aim to subordinate national sovereignty to it.

Other comments

6. Is there any further information you wish the Government to consider? Please explain. Have the guts to stand up to the falsehoods propagated by the UN.
