Setting New Zealand’s post-2020 climate change target

Submission form

The Government is seeking views on New Zealand’s post-2020 climate change contribution under the United Nations Framework Convention on Climate Change (UNFCCC).

You can have your say by making a submission using this form or using the online tool available at www.mfe.govt.nz/more/consultations.

For more information about this consultation:

- Read our Consultation on New Zealand’s post-2020 international climate change contribution web page
- Read our discussion document: New Zealand’s Climate Change Target: Our contribution to the new international climate change agreement

Submissions close at 5.00pm on Wednesday 3 June 2015.

Publishing and releasing submissions

All or part of any written submission (including names of submitters), may be published on the Ministry for the Environment’s website www.mfe.govt.nz. Unless you clearly specify otherwise in your submission, we will consider that you have consented to website posting of both your submission and your name.

Contents of submissions may be released to the public under the Official Information Act 1982 following requests to the Ministry for the Environment (including via email). Please advise if you have any objection to the release of any information contained in a submission and, in particular, which part(s) you consider should be withheld, together with the reason(s) for withholding the information. We will take into account all such objections when responding to requests for copies of, and information on, submissions to this consultation under the Official Information Act.

The Privacy Act 1993 applies certain principles about the collection, use and disclosure of information about individuals by various agencies, including the Ministry for the Environment. It governs access by individuals to information about themselves held by agencies. Any personal information you supply to the Ministry in the course of making a submission will be used by the Ministry only in relation to the matters covered by this consultation. Please clearly indicate in your submission if you do not wish your name to be included in any summary of submissions that the Ministry may publish.
Questions to guide your feedback

Your submission may address any aspect of the discussion document, but we would appreciate you paying particular attention to the questions posed throughout and listed in this form. You may answer some or all of the questions. To ensure your point of view is clearly understood, you should explain your rationale and provide supporting evidence where appropriate.

Objectives for the contribution

1a. We have set the following three objectives for our contribution:

- it is seen as a fair and ambitious contribution – both by international and domestic audiences
- costs and impacts on society are managed appropriately
- it must guide New Zealand over the long term in the global transition to a low emissions world.

Do you agree with these objectives for our contribution?

☑ Yes
☐ No

1b. What is most important to you?

Acting so that my great-grandchildren do not execute my memory as a rapist of Mother Earth.
What would be a fair contribution for New Zealand?

2. What do you think the nature of New Zealand's emissions and economy means for the level of target that we set?

The problem, as with all countries, is wasteful and inefficient use of the world's resources. We can do things better, but will we face up to the fact that less waste and more efficiency reduces the tax take?

1. Rail is 4x more efficient than road, and produces 6x less CO₂.
2. (Coastal) Shipping is 20x more efficient than road.

How will our contribution affect New Zealanders?

3. What level of cost is appropriate for New Zealand to reduce its greenhouse gas emissions? For example, what do you think would be a reasonable impact on annual household consumption?

It can be made to cost, but why should the elimination—or at least reduction—of waste and inefficiency cost households anyway?

4. Of the opportunities for New Zealand to reduce its emissions (as outlined on page 15 of the discussion document), which do you think are the most likely to occur, or be most important for New Zealand?

All are important, and well worthy of consideration and research.

Please consider adding:

1. Power generation from tidal flows in Cook Strait/French Pass: Norway's Statoil works are expert in this technology.
2. Coupling Holcim's cement plant with Brent Constantine's 'CALERA' which absorbs CO₂ into seawater to produce a type of coral 'concrete' (cement production is the 3rd greatest maker of CO₂ of all industries)
Summary

5. How should New Zealand take into account the future uncertainties of technologies and costs when setting its target?

The greatest costs will come from doing nothing.

Other comments

6. Is there any further information you wish the Government to consider? Please explain.

We are likely to face a tsunami of refugees from countries made uninhabitable by the extremes of weather, caused by climate change.

When your submission is complete

Email your completed submission to climate.contribution@mfe.govt.nz or post to Climate Change Contribution Consultation, Ministry for the Environment, PO Box 10362, Wellington 6143.

Submissions close at 5.00pm on Wednesday 3 June 2015.
