

## **Climate Change Contribution Consultation submission**

Setting New Zealand's post-2020 climate change target

Paul Timothy Kennett

I ask that the Intended Nationally Determined Contribution (INDC) be set in accordance with IPCC report recommendations for keeping the global climate under a 2 degree temperature rise.

I ask that the New Zealand government creates and adopts a national CO<sub>2</sub>e reduction plan before the next election, which includes measurable milestones, to ensure New Zealand meets its targets.

Thank you
